

## ...Reciprocating Cylinder Closure

- Greater Loading Capability Achieved Within a Restricted Area.
- Uniform, Controlled Loading To Achieve Proper Gasket Crush.
- Eliminate Inaccuracies and Difficulties Using Hydraulic Torquing.

*Tensioning Solutions :  
Hydraulic Tensioned Bolt*

### Problem:

Non-uniform gasket loading within a restricted area using hydraulic torquing resulted in unacceptable gas

### Solution:

Simultaneous tensioning of Riverhawk hydraulic bolts provided uniform gasket loading resulting in improved sealing.
